About

I am currently pursuing a Bachelor's degree at Savitribai Phule Pune University with a strong passion for Web3, blockchain innovation, and full-stack software development. Highly motivated and forward-thinking, I am dedicated to leveraging emerging technologies to develop scalable and impactful digital solutions that contribute to the advancement of decentralized systems.

Projects

To-Do List DApp (Ethereum-based)   **In Progress**

Developing a decentralized task management application that enables users to securely add, update, and delete tasks on the Ethereum blockchain. The project utilizes Solidity, React.js, and Web3.js, and Hardhat with MetaMask integration to ensure seamless wallet connectivity.

Technical Skills

- **Technologies:** Blockchain Fundamentals, Solidity, HTML/CSS, C/C++, JavaScript, Java, and Object-Oriented Programming (proficient at the intermediate level)

- **Databases:** MySQL and database concepts (SQL querying at an intermediate level)

- **Frameworks & Libraries:** React.js, Web3.js (basic)

- **Tools & Platforms:** MetaMask, VS Code, Remix IDE, Power BI, Hardhat (basic), GitHub (basic)

- **Soft Skills:** Communication, Problem-Solving, Critical Thinking, Teamwork

Education

Bachelor of Science – Blockchain Technology

Savitribai Phule Pune University, Pune

2024 – 2027   CGPA: 8.82 / 10.00
